Project management

Analysis of the requirements

Algorithm 1 An algorithm with caption

```
Require: n \ge 0

Ensure: y = x^n

y \leftarrow 1

X \leftarrow x

N \leftarrow n

while N \ne 0 do

if N is even then

X \leftarrow X \times X

N \leftarrow \frac{N}{2} {This is a comment}

else if N is odd then

y \leftarrow y \times X

N \leftarrow N - 1

end if

end while
```

$$e^{j\pi} + 1 = 0 (3.1)$$
